EDUCATION

Future University in Egypt

2021 – 2025

Bachelor of Computer Science, Cairo, Egypt

RELEVANT COURSEWORK

- Data Structures
- ErrorCamp C++ Problem Solving Instant
- Compiler Design
- Advanced Programming with JavaFX & OOP
- Full Stack Web Development Instant
- Operating Systems
- Algorithms

SKILLS

Programming Languages: Python, Java, C++, JavaScript, TypeScript

Web Development: HTML, CSS, Angular, Node.js, Django, Spring Boot

Desktop Applications: JavaFX

Databases: MySQL, MongoDB

Machine Learning: scikit-learn, pandas, NumPy, PyTorch, TensorFlow

Tools: Git, VS Code, NetBeans, PyCharm

Microsoft Office: Word, PowerPoint

Soft Skills: Communication, Teamwork, Problem Solving, Time Management, Adaptability, Critical Thinking, Fast Learner, Analytical Mindset

EXPERIENCE

Full-Stack Web Development Diploma – Instant

Nov 2023 – Aug 2024

- Completed intensive full-stack training in Angular and Laravel covering frontend/backend integration, authentication, and REST APIs.
- Built a blog application with user login, admin panel, and responsive design (not included due to focus shift from PHP).

Problem Solving Program – Error Camp Instant / Codeforces

Aug 2023 – Oct 2023

- Trained in advanced competitive programming using C++ on Codeforces and LeetCode platforms.
- Earned certificate after completing 50+ structured problem-solving tasks.

Cybersecurity Summer Internship – Future University

Jul 2024 – Aug 2024

- Gained exposure to encryption, network security, and penetration testing fundamentals.
- Simulated vulnerability scanning and report writing using internal university lab environments.

PROJECTS

Cinema Ticket Reservation System

GitHub Repository: Cinema Ticket Reservation System

- Developed a client-server movie ticket booking system using Java, JavaFX, MySQL, and TCP/IP sockets.
- Enabled real-time seat availability with synchronized multithreading, supporting 25+ concurrent users.
- Reduced booking conflicts and double entries by 80% through thread-safe transaction logic.
- Improved backend efficiency by optimizing query execution time by 35%.

- Built a multilingual voice-enabled chatbot using Angular 19, Django, and MongoDB with support for English, Arabic, and Franco.
- Implemented voice recognition and TTS using `speech_recognition`, `gTTS`, and `pyttsx3`, reducing average response time to `1s`.
- Applied SVM and RNN models via `TensorFlow` achieving 92% intent classification accuracy with preprocessed input using `pandas`.
- Integrated SadTalker lip-sync animation for realistic UX, boosting user engagement by 60% during testing.

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science graduate and Full-Stack Web Developer with hands-on experience building scalable applications and AI-integrated systems. Successfully led the development of real-time platforms handling 25+ users concurrently and voice-enabled chatbots with 92% NLP accuracy. Skilled in Python, Java, Angular, and Django. Passionate about problem solving, system design, and leveraging ML and animation to enhance user interaction. Actively improving through 300+ coding problems and ranked contests.
